TRENDS UPDATE

The biggest menswear trends this season and the specs to wear with them...

URBAN UTILITY

Clean lines, textures and plenty of pockets update classic utility style

The perennial utility trend gets a new incarnation this season as a more wearable, smart casual look. The workwear-inspired trend moves away from boiler suit-style jackets and cargos to cleaner lines, angular pockets and high quality materials. Stick with a military palette but experiment with layering different textures to really get the most out of the look.
